## MTC Dressing room security

This unit can be used in dressing rooms to prevent that possible shoplifters remove security labels/hardtags from the merchandise.

A red LED is blinking every 2 seconds to indicate that the dressing room security unit (Tag Locator) is scanning the area inside the dressing room.

On the front of this tag locator is a warning sign indicating that when labels / hardtags will be removed a alarm will be triggered.

### Features:

- Tag locator powered by 2 AA 1.5V batteries
- Battery life up to 2 years
- Perfect, preventing theft method
