MTC EAS tester

A 'must have' for every technician installing RF electronic article surveillance systems. Within a fraction of a second, the EAS Tester provides you with instant information about the systems' center frequency, the sweep width and the sweep frequency, all on one display. No more tedious tuning with a dip-meter, just push the 'ON' button and hold the EAS Tester inside the antenna of the transmitter. Almost instantly a reading of all vital data is displayed on the LCD. The readings change as you adjust the system. The EAS Tester will switch itself off after one minute.

Features:

- Automatic power off after 1 minute
- High range
- Extremely accurate

Specifications
