

EAS system accessories

EAS Tester

A **must have** for every technician installing RF electronic article surveillance systems.

Within a fraction of a second, the EAS Tester provides you with instant information about the systems' center frequency, the sweep width and the sweep frequency, all on one display.

No more tedious tuning with a dip-meter, just push the 'ON' button and hold the EAS Tester inside the antenna of the transmitter.

Almost instantly a reading of all vital data is displayed on the LCD. The readings change as you adjust the system.

The EAS Tester will automatically switch itself off after one minute.
