FITTING ROOM SECURITY

The DETECT-IT Fitting Room Security can be used in fitting rooms to prevent that possible shoplifters remove security labels/hardtags from the merchandise.
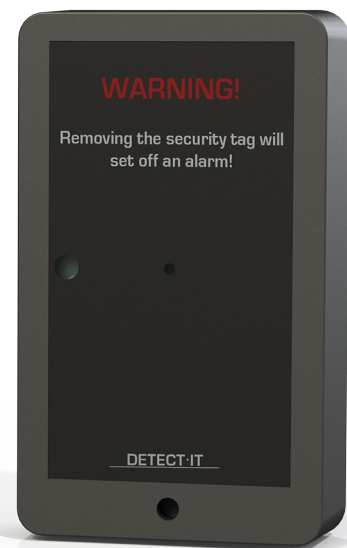

A red LED is blinking every 2 seconds to indicate that the fitting room security unit (Tag Locator) is scanning the area inside the dressing room.

On the front of this unit is a warning text indicating that when labels / hardtags will be removed an alarm will be triggered.
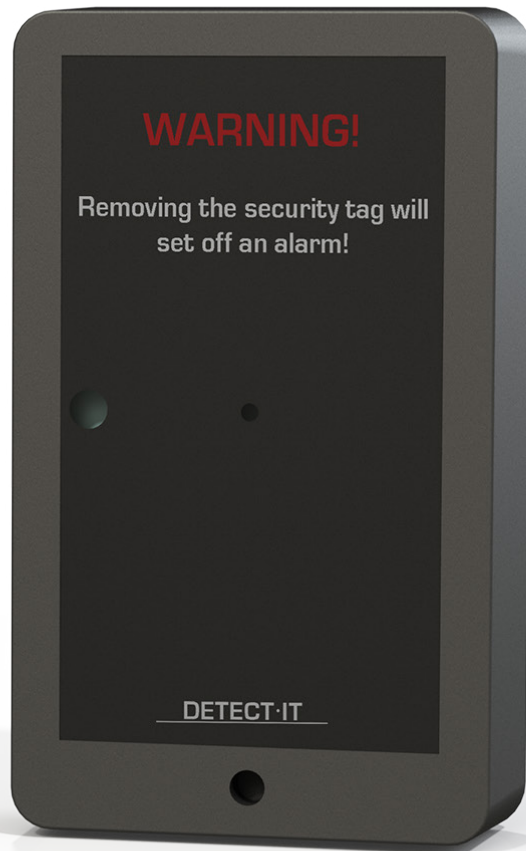

Plug & Play installation
The DETECT IT Fitting Room Security can be used straight of of the box. It includes all necessary installation materal for screw/adhesive mount.

Please note that this product is a pure preventive solution.

WARNING!

Removing the security tag will set off an alarm!
