BODY SCANNER

MTC body scanners are designed to check for 8.2 MHz or 58 KHz tags or labels that have not been removed from articles with the least inconvenience to customers.

The Body Scanner is easy to use and requires minimal training, making it the perfect solution for retail staff. With just a quick scan, you can determine whether an individual or product is authorized to leave your store.

It also avoids body search and physical contact which may not only be offensive as well as embarrassing to both parties.

Investing in the Body Scanner is a smart choice for any retailer looking to improve their security measures.

Feature

Light weight design

High detection range

Audible and visible alarm
